There's an App for that

Step 1 of 2

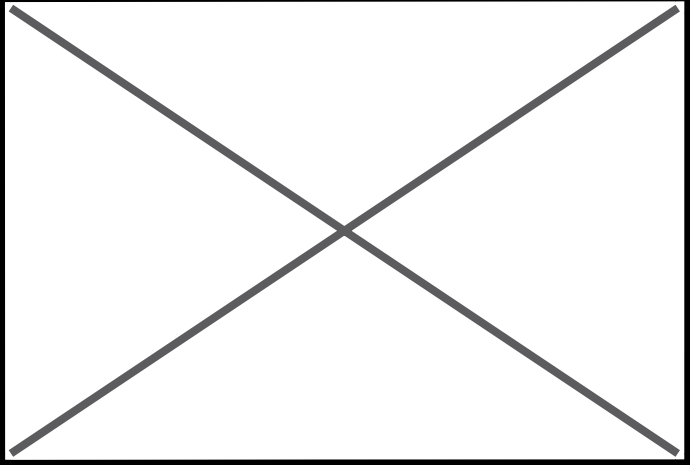

💡 Start from Scratch

Templates

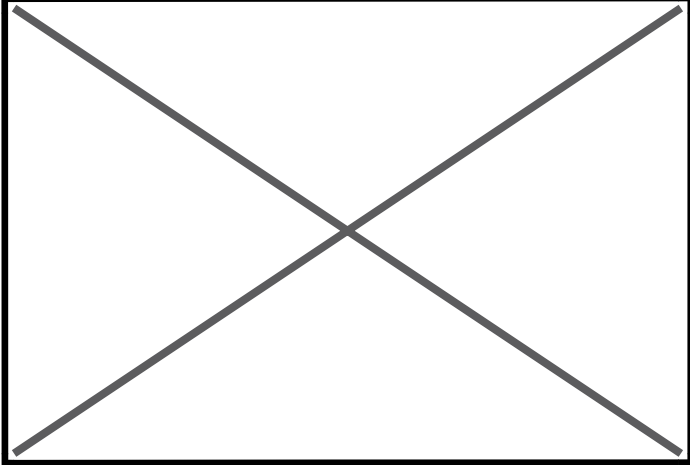

Delivery Tracker

Create an app that allows the user to keep track of expected deliveries

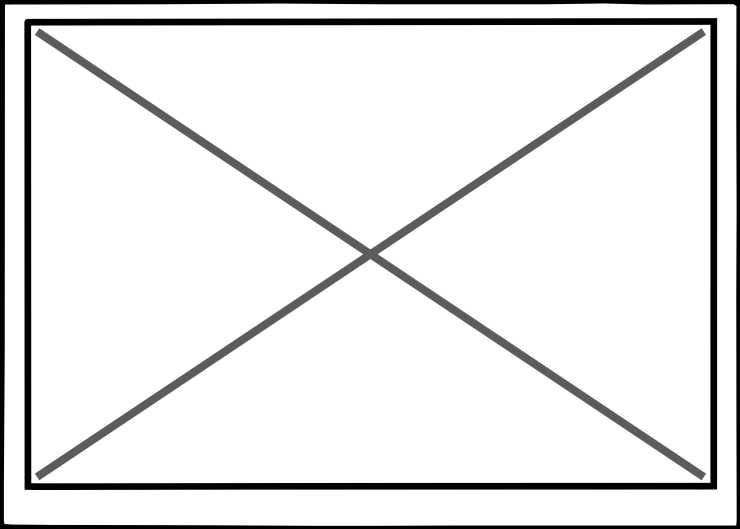

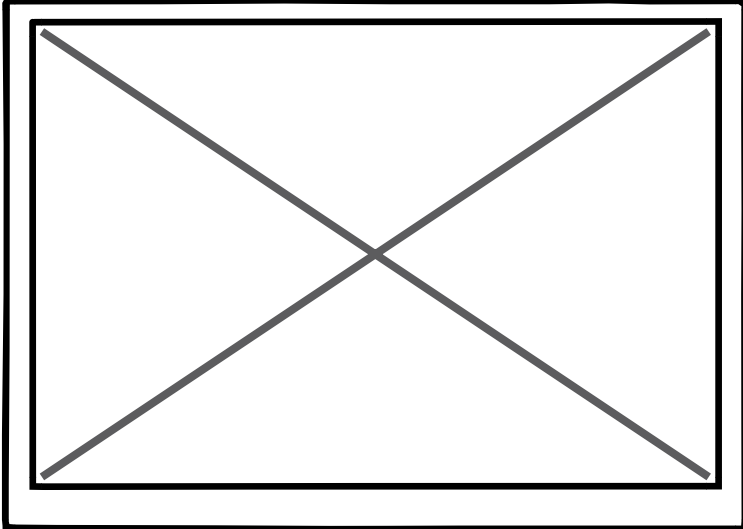

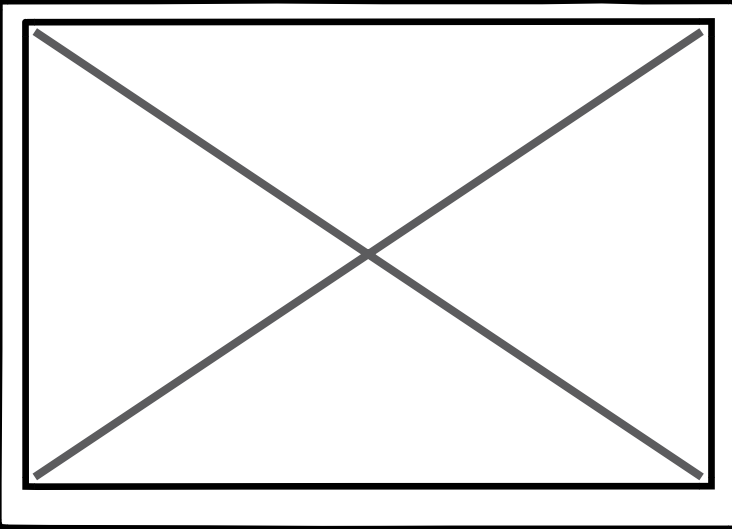

E-Commerce Store

Build an app that allows users to browse and purchase products online

Shared Task Tracker

Create an app that allows multiple users to track and manage tasks together

Layout Preview

Before we build let's take a look at how the app looks on other devices. The Layout Switcher lets us preview the layout on other devices and define changes per device type.

Live Preview

Now that our app is ready, we can launch a Live Preview to simulate how it will behave on the currently selected device type.

Tour.

Excellent! Anything you build can be tested with the Live Preview. This enables you to simulate how the app will behave on a device using the data sources, interactions, and layouts that you've defined.
